Women Engineers of Tomorrow to Visit Concordia University

MONTREAL / January 14, 1994 —Next Wednesday, January 19, 1994, 80 young high school women in Secondary 4 and 5, and their science teachers, will take part in the second *Engineers of Tomorrow Conference* at Concordia. Organized by Concordia's Engineering and Computer Science Students' Association (ECA), and co-sponsored by the Faculty of Engineering and Computer Science and Bell Québec, the conference is designed to introduce young women to engineering and computer science as academic and career options. The theme of this year's conference is "Ingenuity".

After meeting with Dr. Donat J. Taddeo, Dean of the Faculty of Engineering and Computer Science, they will tour the flight simulator laboratory and the multi-media laboratory in the Mechanical Engineering Department. A number of award winning vehicles designed by Concordia's Society of Automotive Engineers (SAE) will also be on display.

The keynote address will be delivered by Martine Corriveau-Gougeon, General Manager Acquisitions for Bell Québec. It will be followed by a question and answer period.

Some of the schools participating in this year's conference: Father MacDonald High School, John Rennie High School, Laurenhill High School, Queen of Angels Academy, Riverdale High School, Shadd Academy and Westmount High School.

For a detailed schedule of events and their specific locations, contact ECA organizers Kim Rokas at 514-848-7408 or Brenda Lord at 514-848-7913.
